NO. OF ENCLS.  
(LISTED BELOW)

SUPPLEMENT TO  
REPORT NO.

THIS IS UNEVALUATED INFORMATION

1. The Tatra motor vehicle plant in Koprivnice was expected to prepare by February 15 the prototype of a new eight-cylinder five-ton truck. Tatra will manufacture only the chassis and engine of this new truck, which is to have six wheels. In the near future production is to start on a new amphibious combat vehicle, which Tatra engineers have been testing. Tatra is sending about 50 engineers to China to supervise the assembling of the vehicles which it exports to that country. It is reported that the production of Tatra passenger cars will be transferred to Poland.
2. Beneath the Jawa plant in Prague-Pankrac are workshops employing about 1,200 workers in the production of fuses for V-2 rockets, which were produced there during World War II.
